

Esneider Ospina Oviedo

Software Developer focused on building accessible products for the web

Relevant Experience

Software Developer - Mobohubb

Jul 2024 - Present

I work on a employee monitoring software, providing bug fixes, feature development, and report generation to ensure system stability and performance. I actively contributed to project structure discussions, offering guidance on best practices and efficient feature implementation. Additionally, I supported other developers by mentoring, assigning tasks, and leading issue resolution efforts to maintain project quality and stability.

Full Stack Developer - TorneosGG

Jan - May 2024

I specialized in developing chat systems and reworking blog sections with SSR Feed for tournament-related projects. I participated in comprehensive reworks of main projects, provided ongoing support, optimized code for performance, and collaborated with design and QA teams to implement changes and ensure quality.

Software Developer - Imagine Apps

Mar 2023 - Jan 2024

I specialized in developing web pages and applications using React, Angular, and diverse libraries. I offer ongoing support, optimize code for performance, and conduct rigorous code reviews for quality assurance. I manage NoSQL and SQL databases, design APIs for seamless integration, and facilitate efficient communication between components and external services.

Full Stack Developer - Blockdemy

May - Nov 2022

In my role, I led the main website, providing ongoing support for optimal functionality and user experience. I implemented automated systems for prompt and accurate event date updates, eliminating manual intervention. I optimized guide distribution through efficient automated processes, ensuring swift delivery. Rigorous unit testing of website components guaranteed reliability and high performance throughout the web application.

Software Developer - Amazonias RGA

Jan 2021 - Feb 2022

I specialized in building robust APIs and user-centric web apps, prioritizing seamless experiences and functionality. Rigorous testing ensures top quality and reliability. I excel in structuring projects, optimizing tech stacks, and creating comprehensive documentation for efficient development and future enhancements.

Skills

Programming Languages

C#, TypeScript, JavaScript, Node, Java, Go

Libraries & Frameworks

React, Redux, Next.js, Astro, Angular, Nest.js, Express, .NET, Svelte, Tailwind, GraphQL, Turborepo, Socket.IO, tRPC, gRPC

Tools & Platforms

Git, GitHub, Bitbucket, Vercel, AWS, Webflow, Docker, Figma, Jira, Linear

Databases & ORM's

MySQL, MongoDB, PostgreSQL, Redis, Mongoose, Entity Framework, Sequelize, TypeORM, Drizzle

Projects

TIG

A CLI tool for managing Git configurations, simplifying SSH credential and repository setting switches across multiple projects.

Workspace

A CLI tool for managing Docker containers, enabling quick access, streamlined commands, and efficient environment configuration

File System

A Go package that simplifies file operations like creating, reading, and managing files, reducing boilerplate code for developers.

Education

Alura

Backend

Interests

Science fiction movies, handball, volleyball, reading, Terraria, and Lofi Hip Hop music
